Description

When I load a simple XML file to Aldo, the denorms run through the complete cycle of denorms, in order, but they run 26 times. So I think the process is getting kicked off for each table or something.

testAdded105Fields_newFields_withPrCMSM.xml
is the simple XML that I loaded and this is on //aldo/tmp and also in //aldo/home/lee

History

#1 - 08/29/2006 02:51 PM - Chad Berkley

This bug was due to an errant embedded for loop that was not removing items from a vector as it should have. it is now fixed.

#2 - 03/27/2013 02:20 PM - Redmine Admin

Original Bugzilla ID was 2526
