Description

need to export "new" interpretations from VegBranch so that one can bulk interpret data in VegBank.

History

#1 - 09/07/2006 12:08 AM - Michael Lee

VegBranch can now do this. Needs a bit more testing to be sure it's working right, including loads to aldo as interpretations. But all looks good currently.

#2 - 09/07/2006 10:47 AM - Michael Lee

aldo doesn't load datasets properly, using weird created accessionCodes instead of the ones in the XML stream. Will fix this with some SQL at the end of the load.

#3 - 09/07/2006 04:31 PM - Michael Lee

aldo loading fixed and these do export out of VegBranch ok.
