<b>Description</b>			
There is no info in the ImageConverter actor about what image types it will handle! (even though a workflow using the actor in the demos shows a choice of output types, this choice is blank in the version of the actor dragged from the actor tree.)			

#### History

##### #1 - 04/10/2007 03:21 PM - Dan Higgins

Changed 'convertTo' StringAttribute to a StringParameter; added output types (e.g PNG, JPG, etc) to a dropdown list.
