#### Description

I tried to run accessionCode generation from /usr/vegbank/bin with ./runAccGen vegbank VB, but either the code isn't updated, or there's some new error, as it reports:

Loading jars from /usr/vegbank/lib

connect string: jdbc:postgresql://localhost/vegbank

org.postgresql.util.PSQLException: Backend start-up failed: org.postgresql.util.PSQLException: FATAL: role "datauser" does not exist

```

#### History

##### #1 - 09/05/2006 04:04 PM - Michael Lee

completed with a full clean install. Then ran ok.

Loading those jars and setting classpath still doesn't work well on aldo.
