Description			
Until we implement a feasible wms feature filter (bug 2548) we must only put publically readable documents in the spatial cache.			

History

Updated SpatialHarvester.queryAllDocids(). Now uses the xml_access table to generate a list of public-readable docids to be inserted into the spatial cache.

Changed severity to 'major' .. mostly because its already fixed and I don't like seeing bold red text in my bug list!
