

## Morpho - Bug #2563

### Multiple repeated delimiter info not saved

10/10/2006 11:37 AM - Dan Higgins

<b>Status:</b>	New	<b>Start date:</b>	10/10/2006

<b>Bugzilla-Id:</b>	2563		
<b>Description</b>			
There is now an eml element for saving info about repeated delimiters (i.e. 'collapseDelimiters') but apparently Morpho does not insert this element into the eml it creates or show it in the treeEditor.			

### History

#### #1 - 12/23/2009 01:55 PM - ben leinfelder

it looks like there is code to put it in the additional metadata part of the EML doc.  
but there were 18 entries of the same additional metadata block:

```
<additionalMetadata><describes>1261604888931</describes>
<metadata><consecutiveDelimiters>true</consecutiveDelimiters>
</metadata>
</additionalMetadata>
<additionalMetadata><describes>1261604888931</describes>
<metadata><consecutiveDelimiters>true</consecutiveDelimiters>
</metadata>
</additionalMetadata>
.....
```

#### #2 - 06/29/2010 05:27 PM - ben leinfelder

additionalMetadata for consecutive delimiters were being copied any time data entities were added/replaced. This could happen a few times during the course of an import and then would happen again and again as entities were edited in a DP.

I've now added a check when adding and replacing entities such that additionalMetadata is only copied if it does not already exist.

I do note that there's no current mechanism to remove this bit of additionalMetadata if an entity is removed from the datapackage. That should probably be considered...
