#### Description

The default skin has some cosmetic problems in Internet Explorer. The blue section header bars do not display properly (gaps appear between the corners and the center bar). This behavior applies to IE 5, 5.5, 6, and 7.

The knb skin appears to use a similar section header bar and it displays properly in IE. The solution will likely involved mimicking the knb skin.

#### History

Put square corners rather than the rounded ones. I spent a little time on trying to mimic the knb but decided on this fix.

Callie
