Bugzilla-ld: 2603

Description

We like the idea of displaying county names by placing the cursor on the county when zoomed in one increment or more.

RKP:

Sounds good

Fixed

It is hard to do realtime retrieval of county names when the mouse moves over the map. I just changed the map labels (county names) to visible when the map is zoomed in to a certain scale.

Also, you can click on any county and get its name

Feature is fine as is.
