#### Description

We think searching all counties within a state was an option previously. This seems useful.

RKP:  
If I understand correctly, you would like the first county in the pick list to be "œall". This sounds like a good idea to me.

Michael Lee:  
Or perhaps better yet would be "--all--" in the pick list as it's really clear that the county is not called "all."

Fixed in the testing site: [152.2.14.231/website/NCFloraTest](http://152.2.14.231/website/NCFloraTest)  
This fix involves changes in the java servlet classes, which can only be updated by the system admin staff of biology department. I will postpone the update of this change to the herbarium server to the time when I finish my first round of fixing of current bugs, because I do not want to bother the admin staff to copy, paste files and restart the server everytime when there is fix ready for update. You can still visit the <http://152.2.14.231/website/NCFloraTest> site for checking the results.

--all-- needs to move from the bottom of the list to the top

##### #4 - 11/08/2006 07:25 PM - Xianhua Liu

fixed

##### #5 - 11/08/2006 11:27 PM - Robert Peet

bug resolved
