<b>Description</b>			
If I go to a large family like Poaceae I see 10 pages and a next at the top right of the list of taxa. However, when I pick a larger number than page 1 the options do nto change. This is a bother when I am at page 10 and my only choice is next but I want to jump deeper into the pile than 11.

I am not quite sure about this requirement. My understanding is that when you click the "next" link, you want the next 10 pages instead of the next page should show up, right?

that would solve the problem
