

InfoVeg - Bug #2630

Verification that CVS records map correctly to Weakley

10/27/2006 04:05 PM - Michael Lee

Status:	New	Start date:	10/27/2006
Priority:	Normal	Due date:	
Assignee:	Robert Peet	% Done:	0%
Category:	atlas	Estimated time:	0.00 hour
Target version:	Unspecified	Spent time:	0.00 hour
Bugzilla-Id:	2630		
Description			
Bug assigned to Bob to scope for Alan			

History

#1 - 10/27/2006 04:12 PM - Michael Lee

This bug is originally from "other ideas and observations from Peet and Weakley"

#2 - 03/04/2007 08:03 AM - Robert Peet

Forbes will compile the list of taxon occurrences in the CVS database and pass on problems for RKP and AW to resolve. Eventually a new set of CVS taxon occurrences will be embedded in the database.

We may need to separate the CVS data into concepts that follow different authorities. If so, this will take some re-engineering by Xianhua
