Description

This is not a bug for the production version of Metacat(1.6.0). The "Head" version of Metacat does not links to the form page where a user can create a new account. The productions server goes to this location:

http://knb.ecoinformatics.org/cgi-bin/ldapweb.cgi?cfg=knb

The test server does not link to the form. I only get the top of the page without the form. It has the "Register for the Knowledge Network for Biocomplexity (KNB)!" title and informaion but no form.

On the test Metacat server the link from the KNB homepage that says create a new account goes to http://ldap.ecoinformatics.org/cgi-bin/ldapweb.cgi. This does not work.

On the production server the link goes to: http://knb.ecoinformatics.org/cgi-bin/ldapweb.cgi?cfg=knb . This works.

History

#1 - 12/06/2006 04:21 PM - Matthew Perry

The knb skins included with metacat are not the official skins deployed on the knb website. The knbweb module contains the official skin and will not have this issue when deployed.
