Description

The current (12/06/2006) cvs head uses an early beta of geoserver 1.4. Though it works flawlessly for our purposes, it would be best to upgrade to geoserver 1.4 final to resolve any outstanding bugs and make it easier to upgrade in the future and support.

History

#1 - 12/07/2006 05:49 PM - Matthew Perry

Due to time constraints, I've upgrade to geoserver 1.4.0 RC5. It's the final release candidate and should be virtually identical to 1.4.0 final when it comes out.

If 1.4.0 final is released in the next week, we'll incorporate that into the metacat 1.7 release. Otherwise, this version seems to work 100% and I don't see any reason to undertake another upgrade immediately before a release.
