Description			
The following skins (esa, nrs, obfs, nceas) should be updated to use .jsp and replace use of tokens as much as possible. If runSpatialOption is false, don't display the map.

This should be part of a larger, more systematic effort to eliminate ant tokens. It should not be a priority for the 1.7 release as there are more pressing issues to deal with.

this is being handled globally by the 1.9 release.
