

InfoVeg - Bug #2717

cvpdata user can see stuff when ftping with the wrong url

01/11/2007 03:15 PM - Michael Lee

Status:	Resolved	Start date:	01/11/2007
Priority:	Normal	Due date:	
Assignee:	Robert Peet	% Done:	0%

Target version:	x2008-Jan	Spent time:	0.00 hour
Bugzilla-Id:	2717		
Description			
The cvpdata user can see too many files when ftping over the wrong URL (see Bob or Michael for what the URL is)			
When you FTP in, via Firefox or WinExplorer, you can view all the folders, then files, and download them too. Seems that cvpdata user has read permissions in folders where they shouldn't have them.			
Bob is looking into finding someone to deal with this.			

History

#1 - 01/11/2007 03:16 PM - Michael Lee

This is the user in the BIOLOGY domain. I wasn't clear about that before.

#2 - 09/06/2007 11:27 AM - Michael Lee

Hinar has been emailed. This is somewhat important as I post user's data for them to download a new copy of the entry tool with last year's data prepopulated. Ideally, this information is confidential.

#3 - 09/15/2007 09:37 AM - Michael Lee

Hinar has rearranged the files on our server and now EEP_Projects is housed in \\bioweb\EEP_Projects. This is blocked off from FTP access for the cvpdata user.

I still emailed Hinar to allow access via http://cvs.bio.unc.edu/EEP_projects instead of http://www.bio.unc.edu/faculty/peet/lab/cvs/EEP_projects

This is a minor issue, but would be nice to have.
