

InfoVeg - Bug #2721

check sppID and NC_Codes in "old" archive db before updating to new

01/13/2007 01:23 PM - Michael Lee

Status:	Resolved	Start date:	01/13/2007
Priority:	Normal	Due date:	
Assignee:	Michael Lee	% Done:	0%
Category:	ArchiveDB	Estimated time:	0.00 hour
Target version:	2009-Jan	Spent time:	0.00 hour
Bugzilla-Id:	2721		
Description			
The old database has two fields that seem to key into the CarSpList from HerbData, and TreeDataSml, but in reality it's only SppID. Some changes may have been made to old_NC_Code field, and these two fields need to be checked prior to migrating to the new archive DB.			

History

#1 - 11/28/2008 11:02 AM - Michael Lee

A spreadsheet was made, marking the few cases where there are disagreements between the two. There are a few where we may want to double-check the final species ID from the next Excel spreadsheet of species updates.

#2 - 09/29/2009 01:14 PM - Michael Lee

The Excel spreadsheet in question is here:
CVS_Occurrences\speciesPossiblyNeedingFixes_NCCode_oldNCCode.xls

forbes and I will deal with this hopefully this week.

#3 - 09/29/2009 02:14 PM - Robert Peet

I am not sure what is going on here. I need to have a conversation with Michael about this migration process.

#4 - 09/30/2009 10:00 AM - Michael Lee

These have been fixed in archive version 1.1.37

relevant files moved to
CVS_Occurrences\OLD
so that they are out of the way.

#5 - 09/30/2009 10:04 AM - Michael Lee

OLD ARCHIVE DATABASE, CVS_b2G.mdb (NCVSPProto4.mdb derived, not from VegBank). I'm calling this 1.0.0 in Bugzilla.
