

Kepler - Bug #2746

Documentation system does not work with java 1.6

01/24/2007 12:49 PM - Chad Berkley

Status:	Resolved	Start date:	01/24/2007
Priority:	Immediate	Due date:

Target version:	1.0.0rc1	Spent time:	0.00 hour
Bugzilla-Id:	2746		
Description			
If you try to run 'ant generateDoc' using java 1.6, it will appear to work, but in reality, Javadoc fails with the error "Error 1". You have to set failonerror="true" in the keplerJavadoc target to see the error. I'm not sure what is causing this but it will need to be fixed as java 1.6 becomes more popular.			

History

#1 - 05/18/2007 11:50 AM - Chad Berkley

This is no longer an issue with the new documentation feature.

#2 - 03/27/2013 02:21 PM - Redmine Admin

Original Bugzilla ID was 2746
