Description			
<p>Someone is having problems getting emails to cvs at unc.edu. A UNC help ticket has been established (UNC-CH Remedy Ticket 996540). The emails also didn't go the bob's email address.</p> <p>However, when we tried to send an email to UNC (cvs at unc.edu) we got a mailer deamon indicating the the message could not be delivered. Are other consultants having similar problems? Please let me know how to proceed.</p> <p>Thanks Grant</p> <p>W. Grant has sent me his bounce message, but not with full headers. Now we need to know the IP info from him. I emailed him.

This is not something that we are hearing from Grant about, so we'll leave contractors to find a different way to get ahold of us, perhaps via Steve or someone at EEP (or use a different email address for them). If this happens again, we could reopen this bug and try to address it.
