InfoVeg - Bug #2752

commit atlas to cvs

01/26/2007 02:04 PM - Robert Peet

Status:	New		**Start date:**	01/26/2007
Priority:	Immediate		**Due date:**	
Assignee:	Xianhua Liu		**% Done:**	0%
Category:	atlas		**Estimated time:**	0.00 hour
Target version:	Unspecified		**Spent time:**	0.00 hour
Bugzilla-Id:	2752			

Description

SEEK policy is to deposit our software in cvs.ecoinformatics.org. Moreover, we are now considering a collaboration with SERNEC where we would share some development activities making it important that they have access to the code so as to have a better idea what we have really been up to.

Bob:

Here are some options about the place on the CVS for SEFlora sources.

1. At the root: /seflora
2. In VegBank: /vegbank/seflora
3. In SEEK project: /seek/projects/seflora
4. In SEEK-Taxon group folder: /seek/projects/taxon/seflora

Please let me know where I should check in the seflora codes.

Thanks,

Xianhua

#2 - 09/08/2007 12:28 PM - Robert Peet

I opt for /seek/projects/taxon/seflora
