<b>Description</b>			
Note that if you map Dendrolycopodium hickeyi and then click on Jackson county, you get: NCU: Lycopodium hickeyi: natural: = RAB: Lycopodium obscurum: natural:<  The < symbol is unclear. If the relationship symbols (<, >, = etc) preceeded the record, it would be clear that < means that the Weakley concept is < the Lycopodium obscureum nominal concept. In contrast, placing the symbol at the end leaves open the possibility that Lycopodium obscurum is < than Dendrolycopodium hickeyi sec Weakley, which is certainly not our intent.			

History

fixed

please check it.

#2 - 03/04/2007 04:34 AM - Robert Peet

Close, but need to reorder components  
Current order = Source | Rel. | Name | Cult.  
New order = Rel. | Name | Source | Cult.

Otherwise a record that reads RAB < Lycopodium obscurum seems to indicate that Radford has the small concept when in fact Radford has the larger concept.
