Bugzilla-Id:	2759		
Description			
Importing from same database is possible, but shouldn't be.			

History

#1 - 02/05/2007 09:31 PM - Michael Lee

fix:

```
If Dir(strDBLoc) <> "" Then
    'have a database, import data into this
    'check to be sure it isn't THIS database:
    If strDBLoc = CurrentProject.FullName Then
        'tell them they picked this database
        Call MsgBox("You have selected the same database as you now are using. You need to select the old datab
ase in the dialog box. Please try again.", vbOKOnly + vbExclamation, CON_APP_TITLE)
        GoTo exitthis
    End If
```

#2 - 02/05/2007 09:39 PM - Michael Lee

rereleasing 2.0.4 since I havent told anyone about it anyway.
