

EML - Bug #277

semantic metadata module/extensions

08/31/2001 10:52 AM - Matt Jones

Status:	In Progress	Start date:	08/31/2001

Bugzilla-Id:	277		
Description Need to extend EML, either by adding a new module or extending the current entity/attribute system, so that semantic metadata can be accomodated. Basically, this means being able to enter terms from an ontology (see bug 274) so that a particulkar data table attribute can be tied into the ontology. See the KDI proposal on canonical variables for more information.			

History

#1 - 09/02/2004 09:38 AM - Matt Jones

Changing QA contact to the list for all current EML bugs so that people can track what is happening.
