Bugzilla-Id:	2770		

Description

A preliminary export function exists that creates a new database after migration of level 5 data in the Entry database. This needs some more work, specifically:

add more definitions for taxonImportance, stemCount, observation

add interface-- tell user where the db is, etc.

an example is/was here:

http://www.unc.edu/~mikelee/cvs/eep/REPORT_FOR_CVS_EEP_DataEntry_v204p_15.zip

History
