Bugzilla-Id:	2773		

Description

these functions try to update nulls to values that can be null, throwing off the SQL:

sas_updateTaxonImportanceCalcFields

sas_updateObservation_calcFields

fix to this: "set field = " & nz(!someOtherField,"null") & " where "...

History

#1 - 02/12/2007 05:45 PM - Michael Lee

better yet, If Not IsNull(!ObsBasalArea) Then

doens't even run sql if null then.
