Description

The NCEAS Data Repository has a form page that uses a drop down choice box. NCEAS (Online form - http://knb.ecoinformatics.org/knb/style/skins/nceas/index.html) This box lists the projects that can be registered using this form. At one time it connected to the NCEAS admin database. At other times the list has been entered in from somewhere in Metacat.

Please see 1552 for a discusson on problems in the past with the admin database and the project list.

Bug 1299 mentions some other project list suggestions but has a milestone of "Postpone". The ability to "search" on the list with somekind of "auto-field" is mentioned and would be helpful. I don't know if that is something that can be quickly and easily added to this fix.
