Metacat - Bug #2796

ESA registry gets locked into searching KNB

03/09/2007 05:06 PM - Will Tyburczy

Target version:	1.9		**Spent time:**	0.00 hour
Bugzilla-Id:	2796			

Description

The ESA registry webpage gets stuck into always searching the KNB for queries after an initial search across the entire KNB. To reproduce this bug:
1) select "search ALL of KNB" and enter a search term
2) look at those results
3) use the back button on the browser
4) then select "search only ESA"

At this point, even though the controls say only to search within ESA, the search query gets sent to knb.ecoinformatics.org, rather than the ESA metacat

History

definitely still a problem - doesn't look that hard to fix...perhaps an "else" when the search all of KNB radio is not selected would be just the thing...

#2 - 07/25/2008 06:35 PM - ben leinfelder

checked change (esa/index.jsp) into (new subversion repo!) to set the form action correctly depending on the checked status of the "search KNB" radio button.
