

InfoVeg - Bug #2801

reports get confused with level 2 data

03/16/2007 12:24 PM - Michael Lee

Status:	Resolved	Start date:	03/16/2007
Priority:	Normal	Due date:

Target version:	x2007-Aug	Spent time:	0.00 hour
Bugzilla-Id:	2801		
Description			
Need to filter out natural stems from reports as they throw the species numbers, plus the default report is not designed to include natural stems.			

History

#1 - 03/16/2007 12:25 PM - Michael Lee

need to include "missing" vigor values (a new value)

#2 - 07/09/2007 12:35 PM - Michael Lee

perhaps the report missing is "total vegetation" not "natural vegetation" as this makes more sense to report aggregated.

#3 - 07/09/2007 04:04 PM - Michael Lee

the totals for vigor and thus percentage are wrong because of null records (not included in total)

#4 - 07/09/2007 05:42 PM - Michael Lee

comment [#2](#) is added as a new sheet, but only if applicable (level 2+)
comment [#1](#) and [#2](#) are address because vigor may now be "unknown"

natural stems are now filtered out, as in description here. This is fixed.
