

Metacat - Bug #2807

Data Set Upload for SAEON

03/28/2007 10:44 AM - Chris Barteau

Status:	Resolved	Start date:	03/28/2007
Priority:	Normal	Due date:	
Assignee:	Chris Barteau	% Done:	0%
Category:	metacat	Estimated time:	0.00 hour
Target version:	1.8	Spent time:	0.00 hour
Bugzilla-Id:	2807		
Description			
Create a web interface to upload data sets and metadata files for Kruger NP. Includes login, and inserting new documents into metacat.			

History

#1 - 03/28/2007 10:53 AM - Chris Barteau

Design diagram:

I'm sticking as closely as possible to prior work (as in KNB, NCEAS, Dev skins), but the existing forms are focused on entering/creating an eml file online and sending it thru register-dataset.cgi, which also does a login, validation of eml, new Doc Id, etc.

There is new work involved because:

*FGDC, not EML

*Login once, in a non-modal manner.

*The metadata file is pre-existing (just upload, not create).

I'm using the JSP API, with most new functionality being put into MetacatClient.java

#3 - 11/02/2007 03:50 PM - Chris Barteau

Create the sanparks skin (for Kruger NP and others).

Includes views SaeonLogin.jsp, SaeonUpload.jsp, and fgdc_1.xsl.

New package "edu.ucsb.nceas.metacat.clientview" was created to contain new class for the added functionality.

Client functions include:

- Login/Logout
- Search/Browse
- FGDC metadata support
- Upload of packages
- Update of files
- Delete files and packages
- Access control (to public) editing
- Download of files (original filenames) and packages (zip)
