Bugzilla-Id:	2809		

Description

Browser Display actor does not detect MacOSX and always uses Netscape for Linux systems. Need to detect the default browser and use that.

see <http://www.centerkey.com/java/browser/>
for java code that detects default browser and works across multiple OSs

History

#1 - 04/03/2007 10:56 AM - Christopher Brooks

See also `ptll/ptolemy/actor/gui/BrowserLauncher.java`, which is based on fairly old code.

<http://www.javaworld.com/javaworld/jvatips/jw-jvatip66.html> (1/99)
<http://browserlaunch.sourceforge.net/> is obsolete, replaced by
<http://browserlaunch2.sourceforge.net/>

It would be nice to have combine code if possible.

_Christopher

#2 - 04/06/2007 03:55 PM - Dan Higgins

This bug has been fixed by adding code from `BareBonesBrowserLauncher` (<http://www.centerkey.com/java/browser/>) to `BrowserDisplay` actor.

Note that using the existing `Ptll BrowserLauncher` code did not seem to work when trying to open a png file.
