

InfoVeg - Bug #2811

Opening database fails when user in CVS_Entry_options isn't in user_entry

04/06/2007 03:24 PM - Michael Lee

Status:	Resolved	Start date:	04/06/2007
Priority:	Normal	Due date:	
Assignee:	Michael Lee	% Done:	0%

Target version:	x2007-June	Spent time:	0.00 hour
Bugzilla-Id:	2811		
Description			
SQL joining two tables is inner join to keep writable, but need a different solution, as this prevents opening the db, with no recourse!			
This would only happen if someone (like me) was monkeying with the innards of the db.			

History

#1 - 04/06/2007 03:32 PM - Michael Lee

Fix:

```
SELECT cvs_entry_options.*, getCurrentUser_directly(True) AS userName, "not " & [userName] & "?" AS thisIsNotMe, "version " &
getValFrmSQL("SELECT versionText FROM Z_VersionCurrent_withAllInfo;") AS version
FROM cvs_entry_options;
```

as src of cvs_entry_options form

#2 - 04/06/2007 03:52 PM - Michael Lee

fixed in v205p7

#3 - 03/27/2013 02:21 PM - Redmine Admin
