

InfoVeg - Bug #2823

Need to write "resample plots" report from archive DB

04/16/2007 04:45 PM - Michael Lee

Status:	Resolved	Start date:	04/16/2007
Priority:	Normal	Due date:	
Assignee:	Michael Lee	% Done:	0%
Category:	ViewerDB	Estimated time:	0.00 hour
Target version:	Unspecified	Spent time:	0.00 hour
Bugzilla-Id:	2823		
Description			
Probably should use migration db to do this: perhaps connect to entry db that will get overwritten as far as data goes. Need rule for what taxa, etc. will then be exported. All taxa in archive may be too many for entry db.			

History

#1 - 10/11/2007 12:09 PM - Michael Lee

Really is an aspect of viewer db, not migration db

#2 - 08/08/2008 12:12 PM - Michael Lee

This is now handled in the viewer database. The data are written to XML files, which can be downloaded by the entry tool.
