<b>Bugzilla-Id:</b>	2829		
<b>Description</b>			
A "Warning: Unrecognized XML Element" message (message box containing "P") appears when starting Kepler after deleting the cache. Probably related to documentation added to MoML files. (the 'P' referring to paragraph tags)			

History

#1 - 04/20/2007 02:56 PM - Dan Higgins

Added <configure> </configure> tags around the paragraph (<P></P>) tags used in the new documentation (ie inside the <KeplerDocumentation> tag) for three of the actors where it was missing. Note that additional tags added for documentation must be enclosed by <configure> or the MoMLParser will show a Warning Message Box

#2 - 03/27/2013 02:21 PM - Redmine Admin

Original Bugzilla ID was 2829
