

InfoVeg - Bug #2845

Populate stemCount.IsPlanted

05/16/2007 11:06 PM - Michael Lee

Status:	Resolved	Start date:	05/16/2007
Priority:	Normal	Due date:	
Assignee:	Michael Lee	% Done:	0%
Category:	ArchiveDB	Estimated time:	0.00 hour
Target version:	Unspecified	Spent time:	0.00 hour
Bugzilla-Id:	2845		
Description			
This field needs to be populated as a default value. It needs to be populated in the unfolding process normally, but we have no special cases yet, so this can wait and be assigned to all stems with X and Y coordinates.			

History

#1 - 05/16/2007 11:35 PM - Michael Lee

For now, can be done with unfolding, like so:
UPDATE entry_stems SET entry_stems.isPlanted = If([IsIndividualRecord],"Y","N")
WHERE (((entry_stems.isPlanted) Is Null));

(added on cheyenne, and niho)

#2 - 05/16/2007 11:38 PM - Michael Lee

OK, I added this in the client.
