#### Description

There are some improvements needed to the stem mapping interface for VMD:

1) If stems have the same X,Y they should have the same letter on the map, perhaps we can add a note stating that multiple stems share the same coordinates, thus are marked with the same letter.

2) the borders of the plot overlap the letters on stems, making it hard to read. Should be reversed.

#### History

##### #1 - 06/11/2007 10:48 AM - Michael Lee

Need to retain original order of stems: copy over newOrder? Need to then reflect this in the report (but not display that info, use StemID instead).

##### #2 - 06/11/2007 11:27 AM - Michael Lee

Also, it would be helpful to display stemCodeID on the form for resampling (not TreeLineID, but the ID of the stem, which is retained year to year).

##### #3 - 06/14/2007 08:29 AM - Michael Lee

Comment [#1](#) resolved (211p2)

##### #4 - 06/14/2007 08:33 AM - Michael Lee

FIXED: 2) the borders of the plot overlap the letters on stems, making it hard to read. Should be reversed.

v211p2

##### #5 - 06/14/2007 09:09 AM - Michael Lee

comment [#2](#) is done:

Also, it would be helpful to display stemCodeID on the form for resampling (not TreeLineID, but the ID of the stem, which is retained year to year).

v211p3

##### #6 - 06/14/2007 12:23 PM - Michael Lee

Done, but could use a test with real data:

1) If stems have the same X,Y they should have the same letter on the map, perhaps we can add a note stating that multiple stems share the same coordinates, thus are marked with the same letter.

v211p3

EVERYTHING ON THIS BUG DONE, but testing.

##### #7 - 06/20/2007 03:14 PM - Michael Lee

finished these upgrade and tested them with messy data and the maps were very legible and helpful.

##### #8 - 06/20/2007 03:14 PM - Michael Lee

Forgot to resolve this bug just a moment ago.
