Description

This is an odd error that seems to be related to the starting up mechanism of the entry tool.

History

#1 - 06/20/2007 10:17 AM - Michael Lee

Doesn't appear when compacting and repairing then starting back up.

#2 - 06/20/2007 10:56 AM - Michael Lee

This may be a Windows Vista issue. Thus far, it only occurs if I double click on the icon to open the file. If I open via "access.exe FileName" the error doesn't occur. So it seems to be a system issue, not an entry tool issue.

But, it doesn't happen on other access databases... but I did see a similar error message when I registered WinZip... who knows.

#3 - 07/06/2007 11:01 AM - Michael Lee

It's a vista issue.
