

InfoVeg - Bug #2878

Check and standardize fit across all projects

06/21/2007 09:31 AM - Michael Lee

Status:	Resolved	Start date:	06/21/2007
Priority:	Normal	Due date:	
Assignee:	Michael Lee	% Done:	0%
Category:	ArchiveDB	Estimated time:	0.00 hour
Target version:	Unspecified	Spent time:	0.00 hour
Bugzilla-Id:	2878		
Description			
It may be possible that some projects have 1=best fit whereas others have 5=best fit. Need to check this (how?) and standardize. I think 5=best fit is the desired scale.			

History

#1 - 11/28/2008 11:02 AM - Michael Lee

I don't think this is needed, because we are not migrating ANY classifications from the old archive database.

#2 - 09/30/2009 10:04 AM - Michael Lee

OLD ARCHIVE DATABASE, CVS_b2G.mdb (NCVSPProto4.mdb derived, not from VegBank). I'm calling this 1.0.0 in Bugzilla.
