

InfoVeg - Bug #2904

Allow editing of default stratum method and cover method

08/10/2007 04:13 PM - Michael Lee

Status:	New	Start date:	08/10/2007
Priority:	Normal	Due date:	
Assignee:	Michael Lee	% Done:	0%

Target version:	WhenWeHaveTime	Spent time:	0.00 hour
Bugzilla-Id:	2904		
Description			
These values are currently stored in X_otherOptions as names "stratumMethodAccessionCode" and "coverMethodAccessionCode". The accession codes could be changed to switch to a different method. But each would require types/indexes that have only a single character for the cover forms to work properly, and the default strata.
