

InfoVeg - Bug #2906

DBA: reports could be improved

08/17/2007 11:32 AM - Michael Lee

Status:	New	Start date:	08/17/2007

Target version:	Postpone	Spent time:	0.00 hour
Bugzilla-Id:	2906		
Description			
Would be nice to allow printing of full plots for plots that have some issue (a check box somewhere on the DBA form, perhaps) which would then change criteria to plotID in (select plotID from [somewhere] WHERE (the criteria));			
ordering by plotID in the reports is problematic: this is order they were entered, not logical order. Should be switched to PTP.			
duplText is not highlighted any colour on the report, which is odd. Should be yellowish and errors pink to draw attention to these locations when there are errors or duplicate messages.			

History

#1 - 11/29/2007 11:55 AM - Michael Lee

to print the full plot, if errors or duplicates are there, use this code:

```
dba_linkToCoverStemData (new case):
Case "full plot if plot has errs/dups"
strMessage = "Full plot if plot has any errors or duplicates on it."

strCrit = "plotID in (Select PlotsWithErrs.plotID from [entry_" & strCovStem & "] as PlotsWithErrs where nz(PlotsWithErrs.[duplicate],0)<>0 OR len(PlotsWithErrs.[errors])>0) "
If strCovStem = "stems" Then 'omit modules:
    strCrit = "((module<>"R") and plotID in (Select PlotsWithErrs.plotID from [entry_" & strCovStem & "] as PlotsWithErrs where PlotsWithErrs.module <> "R" AND (nz(PlotsWithErrs.[duplicate],0)<>0 OR len(PlotsWithErrs.[errors])>0))) "
End If

in dba_linkToCoverStemData()
```

#2 - 11/29/2007 01:35 PM - Michael Lee

Report Header needs to stretched down so that info still appears about cover module/corner. DuplText just needs to have colored background.

#3 - 11/29/2007 01:35 PM - Michael Lee

Might be nice to suppress notes unless there is error/duplicate.

#4 - 11/29/2007 04:15 PM - Michael Lee

Most of this is resolved as of version:
CVS_EEP_DataEntryTool_v221p5_post

Stuff not resolved:

- ordering by plotID in the reports is problematic: this is order they were entered, not logical order. Should be switched to PTP.
- Report Header needs to stretched down so that info still appears about cover module/corner. (workaround in place, extra space there)
- Might be nice to suppress notes unless there is error/duplicate.
