Target version:	Unspecified	Spent time:	0.00 hour
Bugzilla-Id:	2911		
Description			
Unknown "sp." doesn't get populated automatically anymore ... how come? Used to get populated when you selected a genus or family. I think I removed this because it wasn't getting unpopulated when a real species was subsequently selected.			

History

#1 - 08/28/2007 11:33 AM - Michael Lee

fixed.
v211_p64_mid2.zip

was a null issue vs. empty string

#2 - 03/27/2013 02:21 PM - Redmine Admin
