| Description Context menus in Kepler are supposedly added using the uiContextMenuMappings_en_US.properties file. However, I find the attempts to enable the "Listen to Actor" manu fail for an unknown reason. According to the file, one should be able to reuse PTII context menu with an expression like ACTOR->Listen\ to\ Actor=ACTOR->Listen\ to\ Actor since Ptolemy has a 'Listen to Actor' context menu. However, this does not work! (although the method does apparently work in other cases and using other expressions to the right of the '=' sign work) | | | |

History

- #1 - 12/13/2007 01:53 PM - Dan Higgins
Listen to Actor has been added to context menu.
