<b>Target version:</b>	Unspecified	<b>Spent time:</b>	0.00 hour
<b>Bugzilla-Id:</b>	2925		
<b>Description</b>			
Modify XSLT code to generate a delete button for each file in the Update section of the metadata display. Modify/debug java code to handle the delete calls to metacat. Develop JUnit tests for java methods.			
Modify XSLT file to modify the resulting HTML form for aesthetics. Place the delete buttons next to the Update buttons.

### History

#### #1 - 09/04/2007 06:01 PM - Chris Barteau

Added Delete buttons to each file in the "update section" of the metadata display page. You can delete each individual file (which also updates the metadata document) or you can delete the metadata file, which in turn deletes all the data file dependencies.
