

SANParks Informatics - Bug #2930

Improve Login, Upload, Query results, and Metdata display aesthetics

09/03/2007 06:34 PM - Chris Barteau

Status:	In Progress	Start date:	09/03/2007
Priority:	Normal	Due date:

Target version:	Unspecified	Spent time:	0.00 hour
Bugzilla-Id:	2930		

Description

For the metadata display, modify XSLT and CSS files to modify the resulting HTML form for aesthetics. For the other forms, modify their related JSP/HTML/CSS files to improve form aesthetics, and make them more consistent with other metacat forms.

Add a thumbnail to the Metadata display page. This would involve modifying the XSLT file to check for the existence of a thumbnail in the underlying FGDC document. Display it if it exists. Additionally, add the 'projection name' to the display. If the metadata indicates that it is UTM, add the projection details.
