InfoVeg - Bug #2944

Allow multiple concept sources in CVS data

09/08/2007 02:13 PM - Robert Peet

Bugzilla-Id:	2944			

Description

We currently assign all CVS data to Weakley concepts. We will shortly revise the CVS list and replace the records in the database with new ones. Most will still be to Weakley concepts, but some will be to other concepts (primarily RAB). We need to be sure the database system can handle this. Please report what can now be done and what options might be available.

History

#1 - 09/16/2007 08:00 AM - xianhua liu

To change CVS records from name-based to concept-based, we need to:
1. add concept reference in current CVS database
2. set the default value of reference to 'Weakley'
3. edit references as needed
4. change query function accordingly
