

EML - Bug #2979

create Union query to concatenate results from multiple entities

10/09/2007 03:24 PM - ben leinfelder

Status:	Resolved	Start date:	10/09/2007
Priority:	Normal	Due date:	
Assignee:	ben leinfelder	% Done:	0%
Category:	datamanager	Estimated time:	0.00 hour
Target version:	Unspecified	Spent time:	0.00 hour
Bugzilla-Id:	2979		
Description			
The motivation for this enhancement came from both Kepler (wanting to merge data from like-structured datatables in an EMLDataSource actor) and from the FIRST project where a similar function is desired (but across many different packages). Implementation is intended to be a straightforward SQL union/union all between two or more Query objects.

History

#1 - 10/09/2007 03:27 PM - ben leinfelder

created org.ecoinformatics.datamanager.database.Union
created org.ecoinformatics.datamanager.database.UnionTest (test source tree)
modified org.ecoinformatics.datamanager.DataManager to execute Union queries (just like existing normal Query)

#2 - 01/11/2010 11:09 AM - ben leinfelder

this has long been resolved and is in use extensively in the FIRST project
