

Metacat - Bug #298

Problem with Export function

10/16/2001 11:29 AM - Dan Higgins

Status:	Resolved	Start date:	10/16/2001
Priority:	Immediate	Due date:

Target version:	Release1.0	Spent time:	0.00 hour
Bugzilla-Id:	298		

Description

If a dataset which includes a data document is inserted into production Metacat context and then 'Exported' the export of the data document appears to work (because there is also a local copy?) However, if local dataset is deleted and then one 'Exports' from Metacat, the data document contains an error message rather than the data!

It is currently not clear whether this is a Morpho or a Metacat problem. Thus, this error has been entered to both.

History

#1 - 10/22/2001 05:25 PM - Chad Berkley

fixed a bug in metacat where the data file name was not being appended correctly to the path causing an error stream to be written to the data file.

#2 - 03/27/2013 02:13 PM - Redmine Admin

Original Bugzilla ID was 298
