

Metacat - Bug #2994

Create a properties file for use by JUnit Tests

11/02/2007 02:39 PM - Chris Barteau

Target version:	1.9.2	Spent time:	0.00 hour
Bugzilla-Id:	2994		
Description Currently the build.xml file defines a few properties that are used for ant token substitution in JUnit tests. An objective is to replace compile-time token substitution with property lookups at runtime. Since test properties (i.e. usernames and passwords) probably wouldn't be appropriate in the build.properties or metacate.properties file, a separate test.properties file would be a possible solution.			

History

#1 - 02/09/2010 12:55 PM - Michael Daigle

Put the test properties in metacat.properties. Added a properties file in build that specifies the deploy directory.

#2 - 03/27/2013 02:21 PM - Redmine Admin
