#### Description

Morpho currently only sends to metacat a truncated username for login. Need to change this to be the full DN. Also need to change the user profile interface to make it easy for the profile to be mapped to a DN, probably by having the user pick from a preset list of organizations.

#### History

##### #1 - 10/23/2001 05:41 PM - Matt Jones

FIXED. Morpho now constructs a full DN when creating a user profile, and uses that DN when logging into Metacat. The Profile wizard and connection dialog have both changed substantially. Also, one can no longer switch profiles in the connection dialog -- instead, you must do so using the "Switch profiles..." menu item.
