

Kepler - Bug #3003

Copy/Paste of selection: copy should be selected

11/13/2007 03:06 PM - Norbert Podhorszki

Bugzilla-Id:	3003		
Description The copy/paste of a selected part of a graph is inconvenient to use because - the copy usually overlaps with the original graph - the original selection remains active after the paste action. Thus, dragging the copy to a new location is impossible. Dragging the individual elements of the copy is cumbersome and annoying. Suggestion: let the copy be selected, so it can be dragged at once (similarly as Powerpoint works when copying items).			

History

#1 - 06/28/2012 09:38 PM - Christopher Brooks

Now, when entities are copied and pasted, the pasted entities are selected.
This is especially useful when there are a large number of entities.
