<b>Description</b>			
Currently, resampling plots is limited to plots with individual stems. But any plot can be resampled, just no preprinted datasheets can be generated, other than perhaps location information. Giving the next set of investigators a species list is probably bias-inducing.

This has been address, but not tested thoroughly in version 2.2.4\_p0327\_mid7.zip

**#2 - 07/18/2008 10:36 AM - Michael Lee**

any plot can now be resampled, regardless of what plot level and whether or not there are planted stems.
