Description			
<p>FIRST is now at a point where design decisions are critical, and need to be based on an centralized, organized, and prioritized list of use cases. Use cases should be uniformly described using a common template with key information such as:</p> <ul style="list-style-type: none">• Use case name• Use case description• Preconditions• Triggering events• Basic cause of events• Postconditions <p>For a good description of use cases, see: http://en.wikipedia.org/wiki/Use_case</p> <p>For an example of use cases from another project, see: http://reap.ecoinformatics.org/Wiki.jsp?page=Terrestrial_usecases</p>			

History

#1 - 11/20/2007 08:23 AM - ben leinfelder

Created new page wiki page for listing the use cases.
